2017 August 70-697 Exam Dumps with PDF and VCE Free Updated Today! Following are some new 70-697 questions: 1. [2017 New 70-697 Exam Dumps (PDF & VCE) 210Q&As Download: <https://www.braindump2go.com/70-697.html> 2. [2017 New 70-697 Exam Questions & Answers Download: <https://drive.google.com/drive/folders/0B75b5xYLjSSNUnFOeVNOSmo1VIE?usp=sharing>

QUESTION 200A company has an Active Directory Domain Services (AD DS) domain. All client computers run Windows 10 Enterprise. You are configuring security for a portable client computer that does not have a Trusted Platform Module (TPM) chip installed. You need to configure local Group Policy to turn on Windows BitLocker Drive Encryption on the computer. Which two actions should you perform? Each correct answer presents part of the solution. NOTE Each correct selection is worth one point. A. Enable the Enforce drive encryption type on operating system drives policy setting. B. Enable the option to allow BitLocker without a compatible TPM. C. Enable the Require additional authentication at startup policy setting. D. Configure the TPM validation profile to enable Platform Configuration Register indices (PCRs) 0, 2, 4, and 11. Answer: BC Explanation: <https://www.howtogeek.com/howto/6229/how-to-use-bitlocker-on-drives-without-tpm/>

QUESTION 201 Your company network includes a main office and multiple small branch offices. All of the computers in the branch offices run Windows 10 Enterprise and are members of an Active Directory domain. The company has no plans to deploy any servers in the branch offices. Users from some branch offices report that it takes a long time to open documents from a file server that is located in the main office. You need to enable BranchCache on all computers located in the branch offices. What should you do? A. Open Group Policy Editor and enable BranchCache in Distributed Cache mode for the computers in the branch offices. B. Open PowerShell and run the Enable-BCHostedClients cmdlet on the computers in the branch offices. C. Open Group Policy Editor and Enable BranchCache in a Hosted Cache mode for the computers in the branch offices. D. Open PowerShell, run the Set-BCCache cmdlet on computers in the branch offices. Answer: A Explanation: <http://www.computerstepbystep.com/set-branchcache-distributed-cache-mode.html> [https://technet.microsoft.com/en-us/library/hh831696\(v=ws.11\).aspx](https://technet.microsoft.com/en-us/library/hh831696(v=ws.11).aspx)

QUESTION 202 Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question. You have five computers that run Windows 10. Each computer is used by a different user. All of the computers are members of the same workgroup. You need to ensure that all of the users can access the files located in one another's libraries. Access must be granted based on a shared password. What should you configure? A. share permissions B. account policies C. HomeGroup settings D. application control policies E. NTFS permissions F. Microsoft OneDrive G. Encrypting File System (EFS) settings H. software restriction policies Answer: C Explanation: <https://support.microsoft.com/en-za/help/17145/windows-homegroup-from-start-to-finish>

QUESTION 203 You manage desktop computers on your company network. The finance department uses computers that run Windows 7 Enterprise and a 32-bit legacy application. The application has some compatibility issues with Windows 10 Enterprise. The application uses domain single sign-on for authentication. The vendor releases a new version of the application that is fully compatible with Windows 10 Enterprise. These versions cannot be installed on the same computer due to HKEY_CURRENT_USER registry setting conflicts. You need to migrate the finance department computers to Windows 10 Enterprise while meeting the following requirements: - Users are able to use the original version of the application while validating the new version. - Once the new version is validated, the old version is removed with minimal effort. - Users authenticate only once to use the application. Which technology should you choose? A. Microsoft Application Compatibility Toolkit (ACT) B. Hyper-VC. C. Microsoft Application Virtualization (App-V) D. User Experience Virtualization (UE-V) Answer: A Explanation: [https://technet.microsoft.com/en-us/library/ee449434\(v=ws.10\).aspx](https://technet.microsoft.com/en-us/library/ee449434(v=ws.10).aspx)

QUESTION 204 You administer Windows 10 Enterprise tablets that are members of an Active Directory domain. Your company policy allows users to download and install only certain few Windows Store apps. You have created a new AppLocker Packaged Apps policy to help enforce the company policy. You need to test the new AppLocker Packaged Apps policy before you implement it for the entire company. What should you do? A. Open PowerShell and run the Get-AppLockerPolicy -Effective cmdlet to retrieve the AppLocker effective policy. B. Open Group Policy Management console and enforce the new AppLocker policy in Audit Only mode. C. Open Group Policy Management console and run the Group Policy Modeling Wizard. D. Open Group Policy Management console and run the Group Policy Results Wizard. Answer: B Explanation: [https://technet.microsoft.com/en-us/library/hh831440\(v=ws.11\).aspx](https://technet.microsoft.com/en-us/library/hh831440(v=ws.11).aspx) <https://docs.microsoft.com/en-us/windows/device-security/applocker/determine-your-application-control-objectives>

QUESTION 205 Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct

for more than one question in the series. Each question is independent of the other questions in this series. Information and details in a question apply only to that question. You need to change the password used for an L2TP VPN connection. Which Control Panel application should you use? A. Work Folders B. Phone and Modem C. Credential Manager D. Sync Center E. System F. Network and Sharing Center G. RemoteApp and Desktop Connections H. Power Options Answer: F Explanation:
