Question: 1 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Your company has a Microsoft Office 365 tenant. You suspect that several Office 365 features were recently updated. You need to view a list of the features that were recently updated in the tenant. Solution: You use the View service requests option in the Microsoft 365 admin center. Does this meet the goal? A. Yes B. No **Answer: A** **Question: 2**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Your company has a Microsoft Office 365 tenant. You suspect that several Office 365 features were recently updated. You need to view a list of the features that were recently updated in the tenant. Solution: You use Dashboard in Security & Compliance. Does this meet the goal? A. Yes B. No **Answer: B** **Question: 3** Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Your company has a Microsoft Office 365 tenant. You suspect that several Office 365 features were recently updated. You need to view a list of the features that were recently updated in the tenant. Solution: You use Message center in the Microsoft 365 admin center. Does this meet the goal? A. Yes B. No **Answer: B** **Question: 4**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Your company has a main office and three branch offices. All the branch offices connect to the main office by using a WAN link. The main office has a high-speed Internet connection. All the branch offices connect to the Internet by using the main office connection. Users use Microsoft Outlook 2016 to connect to 4 Microsoft Exchange Server mailboxes hosted in the main office. The users report that when the WAN link in their office becomes unavailable, they cannot access their mailbox. You create a Microsoft 365 subscription, and then migrate all the user data to Microsoft 365. You need to ensure that all the users can continue to use Outlook to receive email messages if a WAN link fails. Solution: For each device, you configure an additional Outlook profile that uses IMAP. Does this meet the goal? A. Yes B. No **Answer: B** **Question: 5** Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Your company has a main office and three branch offices. All the branch offices connect to the main office by using a WAN link. The main office has a high-speed Internet connection. All the branch offices connect to the Internet by using the main office connection. Users use Microsoft Outlook 2016 to connect to 4 Microsoft Exchange Server mailboxes hosted in the main office. The users report that when the WAN link in their office becomes unavailable, they cannot access their mailbox. You create a Microsoft 365 subscription, and then migrate all the user data to Microsoft 365. You need to ensure that all the users can continue to use Outlook to receive email messages if a WAN link fails. Solution: For each branch office, you add a direct connection to the Internet. Does this meet the goal? A. Yes B. No **Answer: A** **Question: 6** Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Your company has a main office and three branch offices. All the branch offices connect to the main office by using a WAN link. The main office has a high-speed Internet connection. All the branch offices connect to the Internet by using the main office connection. Users use Microsoft Outlook 2016 to connect to 4 Microsoft Exchange Server mailboxes hosted in the main

office. The users report that when the WAN link in their office becomes unavailable, they cannot access their mailbox. You create a Microsoft 365 subscription, and then migrate all the user data to Microsoft 365. You need to ensure that all the users can continue to use Outlook to receive email messages if a WAN link fails. Solution: You deploy a site-to-site VPN from each branch office to Microsoft Azure. Does this meet the goal? A. Yes B. NO **Answer: A**

Question: 7 You have a Microsoft 365 subscription that contains several Microsoft SharePoint Online sites. You discover that users from your company can invite external users to access files on the SharePoint sites. You need to ensure that the company users can invite only authenticated guest users to the sites. What should you do? A. From the Microsoft 365 admin center, configure a partner relationship. B. From SharePoint Online Management Shell, run the set-SPOSite cmdlet. C. From the Azure Active Directory admin center, configure a conditional access policy. D. From the SharePoint admin center, configure the sharing settings. **Answer: D**

Question: 8 Your company has a hybrid deployment of Microsoft 365. Users authenticate by using pass-through authentication. Several Microsoft A/wt AD Connect Authentication Agents are deployed. You need to verify whether all the Authentication Agents are used for authentication. What should you do? A. From the Azure portal, use the Troubleshoot option on the Pass-through authentication page. B. From Performance Monitor, use the #PTA authentications counter. C. From the Azure portal use the Diagnostics settings on the Monitor blade. D. From Performance Monitor, use the Kerberos authentications counter. **Answer: A**

Question: 9 You have an on-premises web application that is published by using a URL of <https://app.contoso.local>. You purchase a Microsoft 365 subscription. Several external users must be able to connect to the web application. You need to recommend a solution for external access to the application. The solution must support multi-factor authentication. Which two actions should you recommend? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point. A. From an on-premises server, install a connector, and then publish the app. B. From the Azure Active Directory admin center, enable an Application Proxy. C. From the Azure Active Directory admin center, create a conditional access policy. D. From an on-premises server, install an Authentication Agent. E. Republish the web-application by using <http://app.contoso.com> **Answer: BD**
