Answer: ACE
QUESTION 194Which option describes a customer benefit of the Cisco Security IntelliShield Alert Manager?
A. It provides access to threat and vulnerability information for Cisco related products only.
B. It consolidates vulnerability information from an internal Cisco source, which allows security personnel to focus on remediation and proactive protection versus research.
C. It provides effective and timely security intelligence via early warnings about new threats and technology vulnerabilities.
D. It enhances the efficiency of security staff with accurate, noncustomizable threat intelligence, critical remediation information, and easy-to-use workflow tools.
Answer: C
QUESTION 195Which two options are known limitations in deploying an IPS sensor in promiscuous mode versus inline mode? (Choose two.)
A. It is less effective in stopping email viruses and automated attackers such as worms.
B. It requires less of an operational response because the attacks are blocked automatically without operational team support.
C. Sensors in this deployment cannot stop the trigger packet and are not guaranteed to stop a connection.
D. A sensor failure affects network functionality.
E. It does not see the same traffic.
Answer: AC
QUESTION 196Which option describes how the native VLAN is set up on an IPS sensor when VLAN groups are used in an inline deployment of the sensor?
A. The sensor looks at the native VLAN setup on the switch to determine the correct native VLAN to use.
B. The sensor does not care about VLANs.
C. A default VLAN variable must be associated with each physical interface on the sensor.
D. There is no way to set this, so you need to tag all traffic.
E. ISL links are only supported.
Answer: C
QUESTION 197Using the Cisco WSA GUI, where should an operator navigate to determine the running software image on the Cisco WSA?
A. Systems Administration > System Upgrade
B. Systems Administration > Feature Keys
C. Systems Administration > General
D. Admin > System Info
Answer: A
