New QuestionA Chief Executive Officer (CEO) suspects someone in the lab testing environment is stealing confidential information after working hours when no one else is around. Which of the following actions can help to prevent this specific threat?
A. Implement time-of-day restrictions.
B. Audit file access times.
C. Secretly install a hidden surveillance camera.
D. Require swipe-card access to enter the lab.
Answer: D

New QuestionA company hires a third-party firm to conduct an assessment of vulnerabilities exposed to the Internet. The firm informs the company that an exploit exists for an FTP server that had a version installed from eight years ago. The company has decided to keep the system online anyway, as no upgrade exists from the vendor. Which of the following BEST describes the reason why the vulnerability exists?
A. Default configuration
B. End-of-life system
C. Weak cipher suite
D. Zero-day threats
Answer: B

New QuestionAn organization uses SSO authentication for employee access to network resources. When an employee resigns, as per the organization's security policy, the employee's access to all network resources is terminated immediately. Two weeks later, the former employee sends an email to the help desk for a password reset to access payroll information from the human resources server. Which of the following represents the BEST course of action?
A. Approve the former employee's request, as a password reset would give the former employee access to only the human resources server.
B. Deny the former employee's request, since the password reset request came from an external email address.
C. Deny the former employee's request, as a password reset would give the employee access to all network resources.
D. Approve the former employee's request, as there would not be a security issue with the former employee gaining access to network.
Answer: C

New QuestionJoe, a user, wants to send Ann, another user, a confidential document electronically. Which of the following should Joe do to ensure the document is protected from eavesdropping?
A. Encrypt it with Joe's private key
B. Encrypt it with Joe's public key
C. Encrypt it with Ann's private key
D. Encrypt it with Ann's public key
Answer: D

New QuestionA director of IR is reviewing a report regarding several recent breaches. The director compiles the following statistics- Initial IR engagement time frame- Length of time before an executive management notice went out- Average IR phase completion
The director wants to use the data to shorten the response time. Which of the following would accomplish this?
A. CSIRT
B. Containment phase
C. Escalation notifications
D. Tabletop exercise
Answer: D

New QuestionTo reduce disk consumption, an organization's legal department has recently approved a new policy setting the data retention period for sent email at six months. Which of the following is the BEST way to ensure this goal is met?
A. Create a daily encrypted backup of the relevant emails.
B. Configure the email server to delete the relevant emails.
C. Migrate the relevant emails into an "Archived" folder.
D. Implement automatic disk compression on email servers.
Answer: A

New QuestionA security administrator is configuring a new network segment, which contains devices that will be accessed by external users, such as web and FTP server. Which of the following represents the MOST secure way to configure the new network segment?
A. The segment should be placed on a separate VLAN, and the firewall rules should be configured to allow external traffic.
B. The segment should be placed in the existing internal VLAN to allow internal traffic only.
C. The segment should be placed on an intranet, and the firewall rules should be configured to allow external traffic.
D. The segment should be placed on an extranet, and the firewall rules should be configured to allow both internal and external traffic.
Answer: D

New QuestionWhich of the following types of attacks precedes the installation of a rootkit on a server?
A. Pharming
B. DDoS
C. Privilege escalation
D. DoS
Answer: C

New QuestionWhich of the following cryptographic algorithms is irreversible?
A. RC4
B. SHA-256
C. DES
D. AES
Answer: B

New QuestionA security analyst receives an alert from a WAF with the following payload: var data= "<test test>" ++ <./.././.././../etc/passwd>" Which of the following types of attacks is this?
A. Cross-site request forgery
B. Buffer overflow
C. SQL injection
D. JavaScript data insertion
E. Firewall evasion script
Answer: D

New QuestionA workstation puts out a network request to locate another system. Joe, a hacker on the network, responds before the real system does, and he tricks the workstation into communicating with him. Which of the following BEST describes what occurred?
A. The hacker used a race condition.
B. The hacker used a pass-the-hash attack.
C. The hacker-exploited importer key management.
D. The hacker exploited weak switch configuration.
Answer: D
