QUESTION 8  
Case Study 2 - Contoso, Ltd  
Overview  
Contoso, Ltd is a company that has retail stores throughout Europe and North America. Contoso has 5,000 employees worldwide. Contoso has a main office in London. The company has 10 branch offices. In each office, there are 50 managers. There are 100 retail stores in Europe and North America. Each retail store has between five and 20 employees.  
Network Infrastructure  
Contoso has a data center in each office. All the offices connect to each other by using redundant WAN links. Each office has a high-speed connection to the Internet. The network contains an Active Directory forest named contoso.com. All users sign in to their computer by using an Active Directory user account. Each office contains at least two domain controllers from the contoso.com domain. Each office is configured as an Active Directory site. Each branch office has one site link to the main office.  
Planned Changes  
Contoso has a legacy mail application. The company plans to replace the application with a Microsoft Exchange Server 2019 organization. In Exchange Server 2019, all recipients will have an email address that uses a format of username@contoso.com.  
Technical Requirements  
Contoso has the following technical requirements:- All mailboxes must be protected by storing one copy in a branch office and another copy in the main office. For the mailboxes in the London office, a copy must be created in a branch office in Birmingham.- All email sent to external recipients must be delivered by using a local connection to the Internet. If the local connection becomes unavailable, the Internet connection in the main office must be used.- All users will connect to their mailbox by using Microsoft Outlook 2019. All client connections must be established to a namespace of mail.contoso.com.- All client connections must be established to a server in the local office, unless that server becomes unavailable.- The mailboxes of managers must be backed up twice daily. All other mailboxes must be backed up once weekly.- All email sent between the users in different offices must be routed through the main office.- Whenever possible, administrative effort must be minimized.- Whenever possible, costs must be minimized.  
Disaster Recovery Requirements  
Contoso has the following disaster recovery requirements:- All users must be redirected automatically to another Mailbox server if a single Mailbox server fails.- All users must be redirected automatically to another Mailbox server if a single Exchange service fails.- Users who connect to their mailbox by using an Android device must be prevented from using the Outlook app.- Users who connect to their mailbox by using an iOS device must be prevented from using the Outlook app.- Users who connect to their mailbox by using a Windows 10 tablet must be able to use the Outlook app.  
You need to recommend a load balancing solution for the client connections that must be created to meet the disaster recovery requirements. What should you recommend?  
A. Deploy a Layer 7 load balancing solution.  
B. Deploy a Layer 4 load balancing solution.  
C. Implement Network Load Balancing (NLB) on each Exchange server.  
D. Implement DNS load balancing for all the Exchange-related DNS records and implement round robin for DNS name resolution.  
Answer: A  
Explanation: <https://docs.microsoft.com/en-us/exchange/architecture/client-access/load-balancing?view=exchserver-2019>

QUESTION 9  
Case Study 2 - Contoso, Ltd  
Overview  
Contoso, Ltd is a company that has retail stores throughout Europe and North America. Contoso has 5,000 employees worldwide. Contoso has a main office in London. The company has 10 branch offices. In each office, there are 50 managers. There are 100 retail stores in Europe and North America. Each retail store has between five and 20 employees.  
Network Infrastructure  
Contoso has a data center in each office. All the offices connect to each other by using redundant WAN links. Each office has a high-speed connection to the Internet. The network contains an Active Directory forest named contoso.com. All users sign in to their computer by using an Active Directory user account. Each office contains at least two domain controllers from the contoso.com domain. Each office is configured as an Active Directory site. Each branch office has one site link to the main office.  
Planned Changes  
Contoso has a legacy mail application. The company plans to replace the application with a Microsoft Exchange Server 2019 organization. In Exchange Server 2019, all recipients will have an email address that uses a format of username@contoso.com.  
Technical Requirements  
Contoso has the following technical requirements:- All mailboxes must be protected by storing one copy in a branch office and another copy in the main office. For the mailboxes in the London office, a copy must be created in a branch office in Birmingham.- All email sent to external recipients must be delivered by using a local connection to the Internet. If the local connection becomes unavailable, the Internet connection in the main office must be used.- All users will connect to their mailbox by using Microsoft Outlook 2019. All client connections must be established to a namespace of mail.contoso.com.- All client connections must be established to a server in the local office, unless that server becomes unavailable.- The mailboxes of managers must be backed up twice daily. All other mailboxes must be backed up once weekly.- All email sent

between the users in different offices must be routed through the main office.- Whenever possible, administrative effort must be minimized.- Whenever possible, costs must be minimized.

**Disaster Recovery Requirements**Contoso has the following disaster recovery requirements:- All users must be redirected automatically to another Mailbox server if a single Mailbox server fails.- All users must be redirected automatically to another Mailbox server if a single Exchange service fails.- Users who connect to their mailbox by using an Android device must be prevented from using the Outlook app.- Users who connect to their mailbox by using an iOS device must be prevented from using the Outlook app.- Users who connect to their mailbox by using a Windows 10 tablet must be able to use the Outlook app.

You need to configure a mail flow solution for email that will be sent from each branch office to the Internet. The solution must meet the technical requirements.

What is the best way to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

A. a Send connector in the main office that has a cost of 100 and uses a Mailbox server in each office as an SMTP smart host  
B. a Send connector in each office that each has the default costs  
C. two Send connectors in the main office that both have the default costs  
D. a Send connector in each branch office that has a cost of 100 and uses a Mailbox server in the main office as an SMTP smart host

**Answer: D**

**QUESTION 10**

**Case Study 2 - Contoso, Ltd Overview**Contoso, Ltd is a company that has retail stores throughout Europe and North America. Contoso has 5,000 employees worldwide. Contoso has a main office in London. The company has 10 branch offices. In each office, there are 50 managers. There are 100 retail stores in Europe and North America. Each retail store has between five and 20 employees.

**Network Infrastructure**Contoso has a data center in each office. All the offices connect to each other by using redundant WAN links. Each office has a high-speed connection to the Internet. The network contains an Active Directory forest named contoso.com. All users sign in to their computer by using an Active Directory user account. Each office contains at least two domain controllers from the contoso.com domain. Each office is configured as an Active Directory site. Each branch office has one site link to the main office.

**Planned Changes**Contoso has a legacy mail application. The company plans to replace the application with a Microsoft Exchange Server 2019 organization. In Exchange Server 2019, all recipients will have an email address that uses a format of username@contoso.com.

**Technical Requirements**Contoso has the following technical requirements:- All mailboxes must be protected by storing one copy in a branch office and another copy in the main office. For the mailboxes in the London office, a copy must be created in a branch office in Birmingham.- All email sent to external recipients must be delivered by using a local connection to the Internet. If the local connection becomes unavailable, the Internet connection in the main office must be used.- All users will connect to their mailbox by using Microsoft Outlook 2019. All client connections must be established to a namespace of mail.contoso.com.- All client connections must be established to a server in the local office, unless that server becomes unavailable.- The mailboxes of managers must be backed up twice daily. All other mailboxes must be backed up once weekly.- All email sent between the users in different offices must be routed through the main office.- Whenever possible, administrative effort must be minimized.- Whenever possible, costs must be minimized.

**Disaster Recovery Requirements**Contoso has the following disaster recovery requirements:- All users must be redirected automatically to another Mailbox server if a single Mailbox server fails.- All users must be redirected automatically to another Mailbox server if a single Exchange service fails.- Users who connect to their mailbox by using an Android device must be prevented from using the Outlook app.- Users who connect to their mailbox by using an iOS device must be prevented from using the Outlook app.- Users who connect to their mailbox by using a Windows 10 tablet must be able to use the Outlook app.

You need to implement a routing solution that meets the technical requirements.

What should you do?

A. In each office, create a scoped Send connector.  
B. Create an SMTP site link for each office.  
C. Configure the main office as an Active Directory hub site.  
D. Create 10 accepted domains.

**Answer: C**

**QUESTION 11**

**Case Study 2 - Contoso, Ltd Overview**Contoso, Ltd is a company that has retail stores throughout Europe and North America. Contoso has 5,000 employees worldwide. Contoso has a main office in London. The company has 10 branch offices. In each office, there are 50 managers. There are 100 retail stores in Europe and North America. Each retail store has between five and 20 employees.

**Network Infrastructure**Contoso has a data center in each office. All the offices connect to each other by using redundant WAN links. Each office has a high-speed connection to the Internet. The network contains an Active Directory forest named contoso.com. All users sign in to their computer by using an Active Directory user account. Each office contains at least two domain controllers from the contoso.com domain. Each office is configured as an Active Directory site. Each branch office has one site link to the main office.

**Planned Changes**Contoso has a legacy mail application. The company plans to replace the application with a Microsoft Exchange Server 2019 organization. In Exchange Server 2019, all recipients will have an email address that uses a format of username@contoso.com.

**Technical Requirements**Contoso has the following technical requirements:- All mailboxes must be protected by storing one copy in a branch office and another copy in the main office. For the mailboxes in the London office, a copy must be created in a branch office in Birmingham.- All email sent to external recipients must be delivered by using a local connection to the Internet. If the local connection becomes unavailable, the Internet connection in the main office must be used.- All users will connect to their mailbox by using Microsoft Outlook 2019. All client connections must be

established to a namespace of mail.contoso.com.- All client connections must be established to a server in the local office, unless that server becomes unavailable.- The mailboxes of managers must be backed up twice daily. All other mailboxes must be backed up once weekly.- All email sent between the users in different offices must be routed through the main office.- Whenever possible, administrative effort must be minimized.- Whenever possible, costs must be minimized.

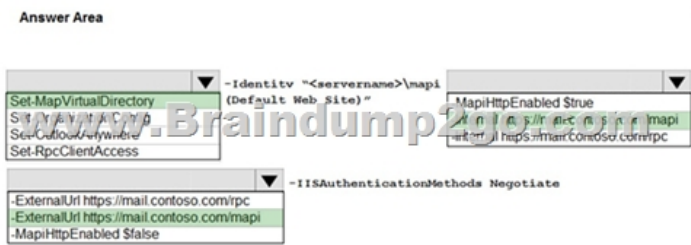

Disaster Recovery Requirements Contoso has the following disaster recovery requirements:- All users must be redirected automatically to another Mailbox server if a single Mailbox server fails.- All users must be redirected automatically to another Mailbox server if a single Exchange service fails.- Users who connect to their mailbox by using an Android device must be prevented from using the Outlook app.- Users who connect to their mailbox by using an iOS device must be prevented from using the Outlook app.- Users who connect to their mailbox by using a Windows 10 tablet must be able to use the Outlook app.

Hotspot Question You need to configure the virtual directories to meet the technical requirements. How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

QUESTION 12 Case Study 2 - Contoso, Ltd Overview Contoso, Ltd is a company that has retail stores throughout Europe and North America. Contoso has 5,000 employees worldwide. Contoso has a main office in London. The company has 10 branch offices. In each office, there are 50 managers. There are 100 retail stores in Europe and North America. Each retail store has between five and 20 employees.

Network Infrastructure Contoso has a data center in each office. All the offices connect to each other by using redundant WAN links. Each office has a high-speed connection to the Internet. The network contains an Active Directory forest named contoso.com. All users sign in to their computer by using an Active Directory user account. Each office contains at least two domain controllers from the contoso.com domain. Each office is configured as an Active Directory site. Each branch office has one site link to the main office.

Planned Changes Contoso has a legacy mail application. The company plans to replace the application with a Microsoft Exchange Server 2019 organization. In Exchange Server 2019, all recipients will have an email address that uses a format of username@contoso.com.

Technical Requirements Contoso has the following technical requirements:- All mailboxes must be protected by storing one copy in a branch office and another copy in the main office. For the mailboxes in the London office, a copy must be created in a branch office in Birmingham.- All email sent to external recipients must be delivered by using a local connection to the Internet. If the local connection becomes unavailable, the Internet connection in the main office must be used.- All users will connect to their mailbox by using Microsoft Outlook 2019. All client connections must be established to a namespace of mail.contoso.com.- All client connections must be established to a server in the local office, unless that server becomes unavailable.- The mailboxes of managers must be backed up twice daily. All other mailboxes must be backed up once weekly.- All email sent between the users in different offices must be routed through the main office.- Whenever possible, administrative effort must be minimized.- Whenever possible, costs must be minimized.

Disaster Recovery Requirements Contoso has the following disaster recovery requirements:- All users must be redirected automatically to another Mailbox server if a single Mailbox server fails.- All users must be redirected automatically to another Mailbox server if a single Exchange service fails.- Users who connect to their mailbox by using an Android device must be prevented from using the Outlook app.- Users who connect to their mailbox by using an iOS device must be prevented from using the Outlook app.- Users who connect to their mailbox by using a Windows 10 tablet must be able to use the Outlook app.

Hotspot Question After you deploy the Exchange organization, you run the `Get-ActiveSyncDeviceAccessRule` cmdlet, and you receive the following output.

```
QueryString      : Outlook
Name             : Outlook (DeviceType)
Characteristics  : DeviceType
AccessLevel     : Block
Identity        : Outlook (DeviceType)
ObjectClass     : {top, msExchDeviceAccessRule}
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point. **Answer Area**

Statements	Yes	No
The device requirements for the iOS devices are met.	<input type="radio"/>	<input type="radio"/>
The device requirements for the Android devices are met.	<input type="radio"/>	<input type="radio"/>
The device requirements for the Windows 10 tablets are met.	<input type="radio"/>	<input type="radio"/>

Answer: **Answer Area**

Statements	Yes	No
The device requirements for the iOS devices are met.	<input type="radio"/>	<input checked="" type="radio"/>
The device requirements for the Android devices are met.	<input type="radio"/>	<input checked="" type="radio"/>
The device requirements for the Windows 10 tablets are met.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation: The rule is incorrectly configured so nothing will be blocked. The QueryString parameter specifies the device identifier that's used by the rule, not the software. !!!RECOMMEND!!!
