[New 300-209 Dumps300-209 Free Dumps VCE Download from Braindump2go[371-381

2018/September Braindump2go 300-209 Exam Dumps with PDF and VCE New Updated Today! Following are some new 300-209 Real Exam Questions: 1./2018 Latest 300-209 Exam Dumps (PDF & VCE) 384Q&As

Download:https://www.braindump2go.com/300-209.html2.l2018 Latest 300-209 Exam Questions & Answers Download:https://drive.google.com/drive/folders/0B75b5xYLjSSNRkY3M21SbTdTNDg?usp=sharingQUESTION 371An engineer is troubleshooting network issues and wants to check the Layer 2 connectivity between routers. Which command must be run?A. show ip eigrp neighborsB. show cdp neighborC. show crypto isakmp sa.D. show crypto issec sa.Answer: BQUESTION 372 Witch option is an advantage of using elliptic curve cryptography?A. Efficiency of operationB. Ease of implementationC. symmetrical key exchangeD. resistance to quantum attacks. Answer: AQUESTION 373A company has acquired a competitor whose network infrastructure uses only IPv6. An engineer must configure VPN access sourced from the new company. Which remote access VPN solution must be used?A. GET VPNB. Any ConnectC. EzVPND. DMVPNAnswer: CQUESTION 374 Which way to send OSPF routing updates over a site-to-site IPsec tunnel is true?A. Set the network type for the inside interface to nonbroadcast mode, and add the remote end as an OSPF neighbor.B. Set the network type for the outside interface to broadcast mode, and add the headend device as an OSPF neighbor.C. Set the network type for the DMZ interface to nonbroadcast mode, add the headend as an OSPF neighbor.D. Set the network type for the outside interface to nonbroadcast mode, and add the remote end as an OSPF neighbor. Answer: DQUESTION 375Which access lists are used in a typical IPsec VPN configuration? A. ACL to NAT traffic across the VPN tunnelB. ACL to define policy based routingC. ACL to define what traffic to exempt from NATD. ACL for routing neighbors across the tunnelAnswer: COUESTION 376Which two parameters are specified in the isakmp (IKEv1) policy? (Choose two.)A. the peerB. the hashing algorithmC. the session keyD. the authentication methodE. the transform-setAnswer: ADQUESTION 377An engineer is assisting in the continued implementation of a VPN solution and discovers an NHRP server configuration. Which type of VPN solution has been implemented?A. DM VPNB. IPsec VPNC. SSL VPND. GET VPNAnswer: AQUESTION 378Which two options are purposes of the key server in Cisco IOS GETVPN? (Choose two.)A. to distributed static routing informationB. to authenticate group membersC. to define and distribute security policiesD. to distribute dynamic routing informationE. to encrypt transit data traffic. Answer: BEOUESTION 379Refer to the Exhibit. Why is the tunnel not establishing?

IPv4 Crypto			conn-1d	slot	status

A. Lifetimes are misconfigured.B. SAKMP packets are blocked.C. NAT statements are missing.D. GRE is not working correctly. Answer: BQUESTION 380An engineer is configuring SSL VPN for remote access. A real-time application that is sensitive to packet delays will be used. Which feature should the engineer confirm is enabled to avoid latency and bandwidth problems associated with SSL connections?A. DTLSB. DPDC. SVCD. IKEv2Answer: AQUESTION 381Which two operational advantages does Get VPN offer over site-to-site IPsec tunnel in a private MPLS-based core network? (Choose two.)A. Packets carry original source and destination IP addresses, which allows (or optimal routing of encrypted traffic.B. Group Domain of Interpretation protocol allows for homomorphic encryption, which allows group members to operate on messages without decrypting them.C. NETVPN is tunnel-less, which allows any group member to perform decryption and routing around network failures.D. Key servers perform encryption and decryption of all the data in the network, which allows for tight security policiesE. Traffic uses one VRF to encrypt data and a different one to decrypt data, which allows for multicast traffic isolationAnswer: AC !!!RECOMMEND!!!1.|2018 Latest 300-209 Exam Dumps (PDF & VCE) 384Q&As
