Add the following XML segment to the application config file in the system serviceModel/bindings configuration section <netMsmqBinding> <binding name="contosoTx" durable="true" receiveContextEnabled="true" /></netMsmqBinding> Then use the NetMsmqBinding named contosoTx to listen for messages from the clients.D.   Add the following XML segment to the application config file in the systemserviceModel/bindings configuration section. <customBinding><binding name="contosoTx"> <transactionFlow /><binaryMessageEncoding /><msmqTransport durable="true" /></binding></customBinding>Then use the CustommiBinding named contosoTx to listen fcw messages from the clients.
