QUESTION 102You manage an Office 365 tenant that uses an Enterprise E1 subscription. You configure a retention policy for all mailboxes. You must apply a new retention policy immediately because of upcoming personnel changes. You need to ensure that the new retention policy is applied to the mailboxes immediately. Which Windows PowerShell cmdlet should you run? A.

Enable-JournalRuleB. New-RetentionPolicyTagC. Start-ManagedFolderAssistantD. Set-CsUserE.

Set-CsPrivacyConfigurationF. Set-HostedContentFilterPolicyG. Set-MalwareFilterPolicyH.

Set-MailboxJunkEmailConfiguration Answer: BExplanation:Use the New-RetentionPolicyTag cmdlet to create a retention tag.

Retention tags are used to apply retention settings to folders and individual items such as e-mail messages and voice mail. These settings specify how long a message remains in a mailbox and the action to be taken when the message reaches the specified retention age. When a message reaches its retention age, it's moved to the user's In-Place Archive or deleted.Reference:

New-RetentionPolicyTag[https://technet.microsoft.com/en-us/library/dd335226\(v=exchg.150\).aspx](https://technet.microsoft.com/en-us/library/dd335226(v=exchg.150).aspx) QUESTION 103Drag and Drop

QuestionYou have an Office 365 tenant that uses an Enterprise E3 subscription. You must prevent five specific users from using Skype for Business Online to send instant messages to external users. All other users must be able to send instant messages to both internal and external users. You need to configure the environment. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Navigate to the Skype for Business admin center and select the Users page.
- Select the user accounts that you need to configure.
- Select External Communications and then clear the **People on public IM networks and Skype for Business** check box.
- Select External Communications and then select the **Turn on communication with Skype users and users of other public IM service providers** check box.
- Navigate to the Skype for Business admin center and select the Organization page.

Answer:

Actions

- Navigate to the Skype for Business admin center and select the Users page.
- Select the user accounts that you need to configure.
- Select External Communications and then clear the **People on public IM networks and Skype for Business** check box.
- Select External Communications and then select the **Turn on communication with Skype users and users of other public IM service providers** check box.
- Navigate to the Skype for Business admin center and select the Organization page.

Answer Area

- Navigate to the Skype for Business admin center and select the Organization page.
- Select the user accounts that you need to configure.
- Select External Communications and then clear the **People on public IM networks and Skype for Business** check boxes.

QUESTION 104You manage an Office 365 tenant that uses SharePoint Online. The organization purchases a second domain name to use with SharePoint Online. You need to create a new site collection that uses the new domain name. Which two actions can you perform? Each correct answer presents a complete solution. A. From the SharePoint admin center, add and configure the domain.

B. From the SharePoint admin center, rename the site collection by using the new domain.C. From the Office 365 admin center, add and configure the domain.D. From the Office 365 admin center, configure the Global Administrator user principal name to use the new domain. Answer: BC QUESTION 105You manage an Office 365 tenant with an Enterprise E3 subscription.You receive an eDiscovery request for a SharePoint Online site collection. You create an eDiscovery case.You need to find and preserve content for the eDiscovery.What should you do next? A. Create an eDiscovery set.B. Create a query filter.C. Export documents from the SharePoint site collection.D. Release the hold on the eDiscovery case. Answer: C QUESTION 106Drag and Drop QuestionYour company uses the Office Deployment Tool to deploy Click-to-Run for Office 365 ProPlus.Users report that confirmation dialog boxes do not appear during the installation of Office 365 ProPlus.You need to ensure that confirmation dialog boxes are displayed to users.How should you complete the relevant segment of the config.xml file? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

The screenshot shows the Office Deployment Tool configuration interface. On the left, the 'Values' pane contains a list of values: 'True', 'False', 'None', 'Full', 'Silent', 'Yes', and 'No'. On the right, the 'Answer Area' shows a code snippet: `<Display Level= Value AcceptEULA= Value />`. The 'Full' value is dragged to the 'Display Level' target and the 'False' value is dragged to the 'AcceptEULA' target.

Answer:

The screenshot shows the Office Deployment Tool configuration interface. On the left, the 'Values' pane contains a list of values: 'True', 'False', 'None', 'Full', 'Silent', 'Yes', and 'No'. On the right, the 'Answer Area' shows a code snippet: `<Display Level= Full AcceptEULA= False />`. The 'Full' value is dragged to the 'Display Level' target and the 'False' value is dragged to the 'AcceptEULA' target.

QUESTION 107A company uses Office 365 ProPlus. The company has a main office and a remote office. The remote office experiences occasional bandwidth issues.You must deploy Visio Pro for Office 365 to selected users in a satellite office that experiences bandwidth issues.You need to deploy Visio Pro for Office 365 to a specific set of users.What should you do? A. Download the installer to a local network share and use the Office Deployment Tool to deploy the application to client.B. Use the Office 365 portal to allow users to deploy Visio Pro.C. Use the Office 365 portal to allow users to deploy Office 365 ProPlus.D. Download the installer to each local machine and use the Office Deployment Tool to deploy the application to the client. Answer: A QUESTION 110You have an on-premises Exchange 2010 organization. All clients use Outlook 2007 SP1. You enable online archive mailboxes in Exchange Online for several users.The users are unable to access the online archive mailboxes in Microsoft Outlook.You need to ensure that users can access the online archive mailboxes in Outlook.What should you do? A. Apply Outlook 2007 SP2 and all related updates.B. In the Office 365 admin center, add the users to the Global Administrators group.C. Instruct the users to access the online archive mailboxes by using Outlook Web App.D. Delete and recreate the users' Outlook profiles. Answer: A QUESTION 111Drag and Drop QuestionYou are the Office 365 administrator for your company.You have been hired to migrate a legacy email solution to Office 365. You are creating a migration plan to identify the client computer components that must be updated for use with Office 365. The following table describes the two computer configurations that are part of the migration.

Scenario	Desktop operating system	Current Office version
1	Windows 7	Office 2010 SP1
2	Windows 8.1	Office 2010 SP2

You need to identify the required updates.Which updates are required? To answer, drag the appropriate status to the correct targets. Each status may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

The screenshot shows the Office Deployment Tool configuration interface. On the left, the 'Status' pane contains a list of status values: 'Up-to-date', 'Outdated', and 'Office update required'. On the right, the 'Answer Area' shows a table with two columns: 'Status' and 'Status'. The 'Up-to-date' status is dragged to the first 'Status' target and the 'Office update required' status is dragged to the second 'Status' target.
