2016/09 New Microsoft 70-532 Exam Questions Updated Today! Instant Free Download 70-532 Exam Dumps(PDF & VCE)105Q&As from Braindump2go.com Today!100% Real Exam Questions! and 100% Exam Pass Guaranteed!Case Study 4 - File Tax-Related Document (QUESTION 29 - QUESTION 40) 1.|2016/09 New 70-532 Exam Dumps(PDF & VCE)105Q&As Download: <http://www.braindump2go.com/70-532.html> 2.|2016/09 New 70-532 Exam Questions & Answers: <https://drive.google.com/folderview?id=0B75b5xYLjSSnfjNITVBrTzd6YmtmOVQ3aHZDYnpNNzAzZTJqLWVLU3JqWDJPSzR4b1hkd2M&usp=sharing> BackgroundYou are developing an Azure solution that individuals and small businesses will use to prepare and file tax-related documents.Business RequirementsGeneralThe solution must provide a way for customers to enter personal and demographic information. Customers must be able to upload income documents and related documents to the solution. The solution must provide reports and summary documents for customers in PDF format.Scope and Device AccessibilityThe solution must support two operational modes: On-Peak and Off-Peak. On-Peak is defined as the first quarter of a year. Off-Peak is defined as the other three quarters of a year. Customers must be able to access the solution by using desktop computers, laptop computers, mobile devices, and tablets.High Availability and Business ContinuityThe solution must be available at all times. When the solution transitions between Off-Peak mode and On-Peak mode, solution availability must not be affected. Disaster recovery must be established for the customers' stored data.DiagnosticsThe solution must log relevant diagnostic data that can be used to troubleshoot the cloud service.ScalabilityThe solution must scale out while transitioning from Off-Peak mode to On-Peak mode.CostThe solution must use cloud resources optimally to minimize operating costs.Storage and SecurityThe solution must be secure to prevent any anonymous access (including read access) to the customers' tax documents.Cross-Premises NetworkingThe solution must extend the developers' on-premises network into Azure.Technical RequirementsThe logical design for the solution is shown in the following exhibit.

Platform-as-a-Service (PaaS)The solution must have two roles: a web role and worker role. The web interface uses a web role to accept and send user input and any related documents. The worker role must access the stored data and prepare the tax documents in the background.

ComputeThe solution must support a minimum of 10 role instances. When the solution is in On- Peak mode, each role instance must be allocated at least 6 GB of memory. The memory can be scaled down to 3 GB when the solution is in Off-Peak mode.

The solution must cache documents locally. The cache does not need to be refreshed during the lifecycle of the worker role.

Role instances that are running should not be affected by topology changes such as an increase in instance count.

StorageThe web role must store documents in blob storage. A SQL database is used to store customer information. The worker role must use queues to process the final tax documents.

Performance and ScalabilityWhen the solution is in Off-Peak mode, it must support at least 150 concurrent database sessions, and the maximum size of the database is 50 GB. When the solution is in On- Peak mode, it must support 750 concurrent database sessions, and the maximum size of the database is 300 GB. Geo-replication must be enabled and must be configurable by using the Azure management portal.

Software PrerequisitesThe solution must install the software that is necessary to generate PDF documents on the server. The software will be provided as a Windows Installer package.

DebuggingSolution errors and warnings that occur in a web role must be logged. The worker role must log any crash dump files. Detailed information about errors and their context must be collected so that the environment in which errors occurred can be simulated locally.

SecurityAt the time that a customer's tax information and documents are accepted, the solution must send an email to the customer. The email contains a secure hyperlink that the customer can use to upload any additional necessary documents. The customer is asked to upload these documents within 48 hours. If the customer does not upload the documents within 48 hours, the solution should not issue a new hyperlink. The solution must send an email to the customer to remind the customer to use the original hyperlink to upload any additional necessary documents.

Network ServicesThe solution must use a cross-premises secure network. The network must be configurable by using the Azure management portal.

Social StructureRelevant portions of the solution files are shown in the following code segments. Line numbers in the code segments are included for reference only and include a two-character prefix that denotes the specific file to which they belong.

InstallPrereqs.cmd

```
ServiceDefinition.csdef
SD01 <ServiceDefinition name="Fabrikam"
  xmlns="http://schemas.microsoft.com/ServiceHosting/2008/10/ServiceDefinition"
  schemaVersion="2014-01.2.3">

SD20     </Imports>
SD21   </WebRole>
SD22 </ServiceDefinition>
```

QUESTION 29 You need to configure diagnostics for the Azure solution. Which two types of diagnostic data should you collect? Each correct answer presents part of the solution. A. Application logs B. Event logs C. Crash dumps D. Infrastructure logs E. IIS logs F. Performance counters Answer: BC

QUESTION 30 You need to configure the virtual network. What are two possible ways to achieve this goal? Each correct answer presents a complete solution. A. Configure a point-to-site virtual network. B. Configure a site-to-site virtual network. C. Configure a multi-site virtual network. D. Configure a cloud-only virtual network. Answer: AB

QUESTION 31 You need to configure role instances. Which size should you specify for the VM? A. Use Small for Off-Peak mode. B. Use Large for On-Peak mode. C. Use Extra Large for On-Peak mode. D. Use Extra Small for Off-Peak mode. Answer: B

QUESTION 32 You need to meet the performance and scalability requirements. Which SQL Database configuration should you use? A. Use the S1 performance level for On-Peak mode. B. Use the P2 performance level for On-Peak mode. C. Use the S2 performance level for On-Peak mode. D. Use the PI performance level for On-Peak mode. Answer: D

QUESTION 33 Drag and Drop Question You need to insert markup at line SD22 to install the software that generates PDF documents. How should you complete the relevant markup? To answer, drag the appropriate code segments to the correct locations. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer:

Startup

Runtime

msisexec.exe /i pdfwriter.msi /qb

elevated

limited

simple

background

< Startup >

<Task

commandLine=" InstallPrereqs.cmd

taskType=" simple

</ Task >

</ Startup >
