QUESTION 1When a database replication issue is suspected, which three tools can be used to check the database replication status? (Choose three.) A. Cisco Unified Communications Manager RTMT toolB. Cisco Unified Communications Manager Serviceability interfaceC. Cisco Unified ReportingD. Cisco Unified Communications Manager CLI interfaceE. Cisco IP Phone Device Stats from the Settings buttonF. Cisco Unified OS Administration interface Answer: ACD QUESTION 2Which two troubleshooting tools would initially be the best to use when troubleshooting the PSTN gateway side of a call routing issue while using Cisco Unified Communications Manager? (Choose two.) A. RTMT trace outputB. Cisco IOS debug commandsC. Dialed Number Analyzer outputD. Cisco Unified Communications Manager alertsE. Cisco IOS show commands Answer: BE QUESTION 3Which command is used on an IOS Router that is acting as a SAF Forwarder to confirm its registration status with a SAF Client? A. show ip asf-forwarder status detailsB. show ospf neighbor detailsC. show ip interface detailsD. show cdp neighbor detailsE. show eigrp service-family ipv4 clients detailsF. show service-family asf-forwarder details Answer: E QUESTION 4In a SAF deployment, the registration status looks correct and the learned patterns appear reachable, but calls are not routed. What is causing this issue? A. network connection failure between the SAF Forwarder and Cisco Unified Communications ManagerB. network connection failure between the primary and backup SAF ForwardersC. TCP connection failure with the primary SAF ForwarderD. TCP connection failure with the backup SAF Forwarder Answer: A QUESTION 5Refer to the exhibits. Assume that all learned SAF routes are placed in the SAF_Pt partition. An IP phone CSS contains the following partitions in this order: Internal_Pt, SAF_Pt. When the IP phone places a call to 3001, what will occur?

Learned Patterns							
Select a Node: CUCM8501Pdt1							
Pattern	TimeStamp	Status	Protocol	AgentId	IP Address	TxDID	
300X	20100403 12:55:55	Reachable	SP	CD101.5.11	10.1.5.11(5080)	0-4422822	
300X	20100403 12:55:55	Reachable	H323	CD101.5.11	10.1.5.11(54532)	0-4422822

A. The call will succeed and will be placed via the SAF network. SAF-learned routes always take precedence.B. The call will fail because it will be blocked by the route pattern.C. The call will be placed in a round-robin fashion between the SAF network

and SIP_Trunk.D. The call will be placed in a round-robin fashion between the SAF network and SIP_Trunk. Every other call will fail. Answer: B QUESTION 6 Refer to the exhibits. Assume that all learned SAF routes are placed in the SAF_Pt partition. The 3XXX directory number pattern is being advertised by a remote cluster and is also being blocked by the local cluster that is shown in the exhibit. An IP phone is attached to the local cluster and is configured with a CSS that contains the following partitions: SAF_Pt and Internal_Pt in this order. When the IP phone places a call to 3001, what will occur?

The image shows two screenshots from the Cisco Unified Communications Manager (CUCM) configuration interface. The top screenshot is the 'Route Pattern Definition' page for the pattern '3XXX'. It shows the 'Route Partition' set to 'Internal_Pt', 'Route Filter' set to 'None', 'Resource Priority Namespace Network Domain' set to 'None', 'Route Class' set to 'Default', and 'Gateway/Route List' set to 'SIP_Trunk'. The bottom screenshot is the 'Purge and Block SAF CCD Learned Routes Information' page, showing the 'Learned Pattern' as '3XXX' and the 'Learned Pattern Prefix' as '3XXX'.

A. The call will succeed and will be placed via the SIP_Trunk. B. The call will fail because it will be blocked by the CCD Blocked Learned Route configuration. C. The call will be placed in a round-robin fashion between the SAF network and SIP_Trunk. D. The call will be placed in a round-robin fashion between the SAF network and SIP_Trunk. Every other call will fail. Answer: A QUESTION 7 When dialing any external SIP URI for a business-to-business call, an endpoint that is registered to the Cisco VCS Control fails to locate the remote endpoint. The same endpoint can successfully call another endpoint that is registered to the Cisco VCS Expressway. How do you resolve this issue? A. Add traversal call licensing on the Cisco VCS Expressway. B. Add traversal call licensing on the Cisco VCS Control. C. Add a multisite option to the endpoint. D. Configure a proper DNS zone on the Cisco VCS Expressway. E. Configure a traversal zone between the Cisco VCS Control and the Cisco VCS Expressway. F. Configure a SIP route pattern in Cisco Unified Communications Manager. Answer: D QUESTION 8 Which CLI command monitors ILS replication progress? A. `utils ils findxnode` B. `utils ils show peer info` C. `utils ils showpeerinfo` D. `utils ils lookup` Answer: C QUESTION 9 When parsing trace output after the call routing decision and path selection have been made, which two records can be found in the CCM|RouteList? (Choose two.) A. `PretransfromDigitString` B. `CallingPartyNumber` C. `PretransformCallingPartyNumber` D. `RouteListName` E. `findLocalDevice` F. `RouteListCdr` : Answer: DF QUESTION 10 Refer to the exhibit. The exhibit shows the output of `debug isdn q931`. An inbound PSTN call was received by a SIP gateway that is reachable via a SIP trunk that is configured in Cisco Unified Communications Manager. The call failed to ring extension 3001. If the phone at extension 3001 is registered and reachable through the gateway inbound CSS, which three actions can resolve this issue? (Choose three.)

The image shows the output of the `debug isdn q931` command. It displays two records. The first record is a SETUP message from the SIP gateway to the SIP trunk, showing the calling party number as 0x1180, '4940302156001' and the called party number as 0x81, '2288223001'. The second record is a RELEASE_COMP message from the SIP gateway to the SIP trunk, showing the cause as 0x8081 - Unallocated/unassigned number.

A. Change the significant digits for inbound calls to 4 on the SIP trunk configuration in Cisco Unified Communications Manager. B. Configure the digit strip 4 on the SIP trunk under Incoming Called Party Settings in Cisco Unified Communications Manager. C. Configure a translation pattern in Cisco Unified Communications Manager that can be accessed by the trunk CSS to truncate the called number to four digits. D. Configure a called-party transformation CSS on the gateway in Cisco Unified Communications Manager that includes a pattern that transforms the number from ten digits to four digits. E. Configure a voice translation profile in the SIP Cisco IOS gateway with a voice translation rule that truncates the number from ten digits to four digits. F. Configure the Cisco IOS command `num-exp 2288223001 3001` on the gateway ISDN interface. Answer: ACE QUESTION 11 Which step in the problem-solving model is important to accurately interview end users to get all the pertinent details of the problem? A. Implement

Action PlanB. Define the ProblemC. Consider the PossibilitiesD. Create Action PlanE. Gather FactsF. Observe ResultsG. Restart Problem-Solving ProcessH. Problem Resolved Answer: EQUESTION 12You are a network technician working in the Network Company. Recently, users complain that they cannot call the PSTN. With the help of testing, you find that the gateway is not switching to the secondary call agent when the primary call agent is unreachable. In order to permit the MGCP gateway to take use of a different call agent once the primary fails, which configuration should you make? A. Add ccm-manager fallback-mgcp command to the gateway.B. Add ccm-manager redundant-host command to the gatewayC. Assign a Cisco Unified CallManager group including the secondary call agent to the gatewayD. Define gateway as a non-gatekeeper-controlled intercluster trunk with the secondary Cisco Unified CallManager defined. Answer: B QUESTION 13 ???????? 300-080 Updated Questions are 2015 Latest Released Which 100% will Meet in Your 300-080 Test! Braindump2go New Released 300-080 Exam Dumps Contain All New Added Questions Which Will Help you Have A Totally Success in 2015 New Tear! Download our 100% Pass Guaranteed 300-080 Exam Dumps Full Version, special 10% Off Discount enjoyed!
