QUESTION 9Your company uses a Window Store for Business that contains an app named App1. You have three computers that are prevented from accessing the Internet.You need to distribute App1 to the three computers.What are two possible ways to achieve the goal? Each correct answer presents a complete solution.A. a provisioning package created by using Windows Imaging and Configuration DesignerB. A deployment from Microsoft Intune.C. A deployment from Windows Deployment Services (WDS)D. an AppX package deployed by using Deployment Imaging Servicing and Management (DISM)E. an answer file created by using Windows System Image Manager (Windows SIM)Answer: ADQUESTION 10Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Your network contains a single Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2.A user named User1 is a member of the local Administrators group on Computer1 and Computer2. User1 fails to remotely manage the devices on Computer2 by using Device Manager on Computer1. User1 can connect to Computer2 remotely by using Computer Management. You need to ensure that User1 can disable a device on Computer2 remotely. Solution: You modify the Windows Firewall settings on Computer2.Does this meet the goal?A. YesB. NoAnswer: AExplanation:

[https://technet.microsoft.com/en-us/library/cc766438\(v=ws.11\).aspx](https://technet.microsoft.com/en-us/library/cc766438(v=ws.11).aspx)QUESTION 11Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Your network contains a single Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2.A user named User1 is a member of the local Administrators group on Computer1 and Computer2. User1 fails to remotely manage the devices on Computer2 by using Device Manager on Computer1. User1 can connect to Computer2 remotely by using Computer Management. You need to ensure that User1 can disable a device on Computer2 remotely. Solution: You enable Remote Desktop on Computer2, and you instruct User1 to use Remote Desktop.Does this meet the goal?A. YesB. NoAnswer: BExplanation:[https://technet.microsoft.com/en-us/library/cc766438\(v=ws.11\).aspx](https://technet.microsoft.com/en-us/library/cc766438(v=ws.11).aspx)QUESTION 12 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Your network contains a single Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2.A user named User1 is a member of the local Administrators group on Computer1 and Computer2. User1 fails to remotely manage the devices on Computer2 by using Device Manager on Computer1. User1 can connect to Computer2 remotely by using Computer Management. You need to ensure that User1 can disable a device on Computer2 remotely. Solution: You start the Plug and play and Remote Registry services on Computer2. Does this meet the goal?A. YesB. NoAnswer: BExplanation:

[http://winintro.com/?Category=Windows\\_10\\_2016&Policy=Microsoft.Policies.DeviceInstallation%3A%3ADeviceManagement\\_RP\\_CInterface\\_Allow](http://winintro.com/?Category=Windows_10_2016&Policy=Microsoft.Policies.DeviceInstallation%3A%3ADeviceManagement_RP_CInterface_Allow)QUESTION 13Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.Your network contains a single Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2.A user named User1 is a member of the local Administrators group on Computer1 and Computer2. User1 fails to remotely manage the devices on Computer2 by using Device Manager on Computer1. User1 can connect to Computer2 remotely by using Computer Management. You need to ensure that User1 can disable a device on Computer2 remotely. Solution: You enable the Allow remote access to the Plug and Play interface Group Policy setting on Computer2.Does this meet the goal?A. YesB. NoAnswer: BExplanation:Allow remote access to Plug and Play interface has to do with RDP not Device Manager.QUESTION 14Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. While performing maintenance on a computer, you open Indexing Options, and then you click Pause.You complete the computer maintenance.You need to resume indexing.Solution: From the Start menu, you click Power and then you click Restart.Does this meet the goal?A. YesB. NoAnswer: AExplanation:
