QUESTION 81 You have an Exchange Server 2003 organization. You install an Exchange Server 2010 Edge Transport server on the network. You need to ensure that the Edge Transport server can send and receive e-mail messages from the Internet for the organization. You configure the Exchange Server 2003 servers to send all e-mails for external recipients to the Edge Transport servers. What should you do next? A. Create and configure a sharing policy. B. Install the Exchange Server 2010 schema extensions. C. Create an Edge Subscription file. Copy the file to the Exchange Server 2003 servers. D. Create and configure a Send connector on the Edge Transport server. Create and configure a Receive connector on the Edge Transport server. Answer: D Explanation: <http://technet.microsoft.com/en-us/library/bb124011.aspx> **QUESTION 82** You have an Exchange 2010 organization named contoso.com. The organization contains two servers named Server1 and Server2. Server1 has the Client Access, Hub Transport, and Mailbox server roles installed. Server2 has the Edge Transport server role installed. You need to verify whether Server2 successfully replicates recipient data and configuration information from Server1. What should you do? A. From Server2, run the Test-ReplicationHealth cmdlet. B. From Server2, run the Get-OrganizationConfig cmdlet. C. From Server1, run the Test-EdgeSynchronization cmdlet. D. From Server1, run the Get-EdgeSyncServiceConfig cmdlet. Answer: C Explanation: <http://technet.microsoft.com/en-us/library/aa996925.aspx> **QUESTION 83** You have a Hub Transport server named Server1 that runs Exchange Server 2010. All Exchange users use IMAP4 to retrieve e-mail. You need to ensure that all users can send e-mail by using SMTP. Your solution must not require any modifications to the default connectors. What should you do? A. Configure IMAP4 clients to send e-mail by using TCP port 25. B. Configure IMAP4 clients to send e-mail by using TCP port 587. C. Create a new Send connector and configure the connector to use port 110. D. Create a new Send connector and configure the connector to use port 143. Answer: B **QUESTION 84** Your company has a main office and 20 branch offices. Each office contains an Exchange Server 2010 Mailbox server and an Exchange Server 2010 Hub Transport server. Each office is configured as a separate Active Directory site. Each branch office site has one IP site link that connects to the main office site. You need to ensure that e-mail sent between offices is routed through the Hub Transport servers in the main office. What should you do? A. From the Exchange Management Shell, modify the Exchange-specific site link costs. B. From the Exchange Management Shell, configure the main

office site as a hub site.C. From Active Directory Sites and Services, modify the site link costs.D. From Active Directory Sites and Services, remove all IP site links and then create new SMTP site links. Answer: B QUESTION 85You install an Exchange Server 2010 Hub Transport server named Hub1. You need to ensure that Hub1 can receive e-mail messages sent from Internet hosts. What should you do? A. Enable the Anonymous users permission group for the Client Hub1 Receive connector.B. Enable the Anonymous users permission group for the Default Hub1 Receive connector.C. Create a Receive connector and set the intended use to Client. Modify the port for the connector.D. Create a Receive connector and set the intended use to Custom. Modify the remote IP addresses range for the connector. Answer: BExplanation:

<http://technet.microsoft.com/en-us/library/bb738138.aspx> QUESTION 86You have an Exchange Server 2010 organization. You discover that messages sent to the Internet include internal Exchange routing information in the message header. You need to prevent internal routing information from being sent to external recipients. What should you do? A. Create a new remote domain. B. Modify the permissions of the Send connector.C. Modify the properties of the sender reputation feature.D. Enable domain security on the default Receive connector. Answer: BExplanation:
