QUESTION 21Drag and Drop QuestionYou are the Office 365 administrator for your company. Your company uses Microsoft SharePoint Online to share documents with internal and external users.A document associated with a bidding process was shared in the environment. Guest access to the document was provided to several vendors. The bidding process has now ended.You need to revoke vendor access to the document.Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

In the **Users and Permissions** area, click **Access requests and invitations**.

Next to the URL for the guest link, click the **Delete** button.

In the properties window, click **Withdraw**.

Go to the Site Settings page.

Point to the document, and then click the associated **Open Menu** button.

In the **External User Invitations** area, point to each vendor you want to uninvite, and then click the associated **Open Menu** button.

Browse to the SharePoint library that contains the document.

In the sentence **Open to anyone with a guest link**, click a **guest link**.

Answer Area

Answer:

In the **Users and Permissions** area, click **Access requests and invitations**.

Next to the URL for the guest link, click the **Delete** button.

In the properties window, click **Withdraw**.

Go to the Site Settings page.

Point to the document, and then click the associated **Open Menu** button.

In the **External User Invitations** area, point to each vendor you want to uninvite, and then click the associated **Open Menu** button.

Browse to the SharePoint library that contains the document.

In the sentence **Open to anyone with a guest link**, click a **guest link**.

Answer Area

Browse to the SharePoint library that contains the document.

Point to the document, and then click the associated **Open Menu** button.

In the sentence **Open to anyone with a guest link**, click a **guest link**.

Next to the URL for the guest link, click the **Delete** button.

QUESTION 22Contoso, Ltd. has an Office 365 Enterprise E3 plan.Contoso uses the domain contoso.com for email and instant messaging (IM).Contoso requires that website visitors who go to <http://contoso.com> be directed to the company's Microsoft SharePoint Online publicwebsite.You need to configure Office 365 to redirect the website requests without affecting the company's email or IM.What should you do? A. In the SharePoint admin center, rename the public website to <http://contoso.com>.B. In the Office 365 admin center, change the domain purpose for contoso.com to SharePoint.C. On the authoritative DNS servers, add a CNAME record for contoso.com.D. In the Office 365 admin center, add a new subdomain. Then set up redirection for

<http://contoso.com> to the subdomain. Answer: D QUESTION 23 You manage client computing devices for a company. Office 365 was recently deployed for all employees in the sales department. company policy requires the installation of Office 365 ProPlus on all new client computing devices for sales department employees. The company recently purchased Surface Pro 2 devices for all sales department employees. You are testing a new Office deployment for a specific user on a Surface Pro 2. You are unable to activate Office on the Surface Pro 2. An error message states that the install limit has been reached. You need to activate Office 365 ProPlus on the Surface Pro 2 for the user. What should you do? A. Sign in to the Office 365 portal as the user and deactivate unused Office 365 ProPlus licenses. B. Sign in to the Office 365 admin center as an Office 365 administrator. Remove and then re-add the user's Office 365 ProPlus license. C. Install a licensed copy of Office Professional Plus 2013 that is covered under a volume licensing agreement. D. Sign in to the Office 365 admin center as an Office 365 administrator and deactivate unused Office 365 ProPlus licenses. Answer: A QUESTION 24 You are the Office 365 ProPlus administrator for your company. Each user is assigned an E3 license. All client computers are on a local area network. Users do not have administrative privileges on their client computers. You are configuring a network-based installation of the most recent version of Office for all client computers. You need to ensure that the installation process does not display any dialog boxes or require user input. Which option should you specify in the Configuration.xml file? A. <Display Level="Minimal" AcceptEULA="TRUE" /> B. <Display Level="Silent" AcceptEULA="TRUE" /> C. <Display Level="None" AcceptEULA="TRUE" /> D. <Display Level="Full" AcceptEULA="TRUE" /> Answer: C QUESTION 25 Drag and Drop Question You are an Office 365 migration consultant. Your company has been hired to migrate the legacy email solution of another company to Office 365. You are creating a migration plan for the two scenarios shown in the following table.

Scenario	Desktop operating system	Current Office version
1	Windows 10	Office 365 ProPlus
2	Windows 7	Office 365 ProPlus

You need to evaluate whether the client computer software supports Office 365. Which software requires action? To answer, drag the appropriate status to each target in the scenario table. Each status may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

	Answer Area		
	Scenario	Operating system status	Office status
	1		
	2		

Answer:

	Answer Area		
	Scenario	Operating system status	Office status
	1	Meets requirements	Office update required
	2	Operating system update required	Meets requirements

QUESTION 26 Your company decides to migrate all users to Office 365. As part of the migration, Office 365 ProPlus will be installed on all client computers and the company will use Office Telemetry. You need to produce a report that contains the information collected by Office Telemetry. Which three types of information can you include in the report? Each correct answer presents part of the solution. A. Information about files that are not in the Most Recently Used list B. The names of add-ins and solutions that interact with Office C. The file names of Office files that are in the Most Recently Used list D. System information such as user name and computer name E. The contents of all files that are in the Most Recently Used list Answer: BCD QUESTION 27 A company is upgrading from Office 2010 to Office 365 ProPlus. The company plans to use the Telemetry Dashboard to identify document compatibility issues. You need to enable telemetry and immediately trigger data collection. Which two actions should you perform? Each correct answer presents part of the solution. A. Modify the AgentInitWait and AgentRandomDelay registry values on the client computers. B. Configure a Group Policy Object to turn on telemetry data collection in the User Configuration settings. C. Configure a Group Policy Object to turn on telemetry data collection in the Computer Configuration settings. D. Delete the contents of the telemetry shared folder. E. Run the gpupdate.exe /force command on the file server that hosts the telemetry shared folder. Answer: AB QUESTION 28 Your company hires a new human resources consultant. Corporate policy specifies the following requirements for consultants: - Consultants must supply their own laptops. - The company must supply an Office 365 cloud account. - Consultants may have access only to Microsoft Exchange Online, Microsoft

SharePoint Online, and Office 365 ProPlus. In the Office 365 admin center, you create an account for the consultant and assign an E3 license to the account. You send instructions to the consultant for installing Office 365 ProPlus on her laptop. The consultant signs in to the Office 365 portal and changes her password when prompted to do so. She successfully accesses her email by using Outlook Web App (OWA). She attempts to install Office 365 ProPlus, but is unable to do so. The Software page of the Office 365 portal displays the options shown in the following image. You need to ensure that the consultant can install Office 365 ProPlus. What should you do?

A. License the consultant's account for Office 365 ProPlus. B. License the consultant's account for Office Web Apps. C. Issue a corporate laptop to the consultant and have her restart the Office 365 ProPlus installation process on that laptop. D. Assign an E1 license to the consultant's account. Answer: A Explanation:

<http://www.firebrandtraining.co.uk/pdf/learn/microsoft/mcsa-office-365-important-facts-for-office-365.pdf> QUESTION 29 You are the Office 365 administrator for your company. The company environment includes Office 2007, Office 2010, Office 2013, Windows 7, and Windows 8. Office Telemetry logging has been enabled in the environment. The company plans to use coauthoring. You need to gather information about Microsoft Excel XLS real-time data (RTD) add-ins. Which two methods can you use to achieve this goal? Each correct answer presents a complete solution. A. Open workbooks by using Excel 2013 on client computers that run Windows 7. B. Open workbooks by using Excel 2013 on client computers that run Windows 8. C. Open workbooks by using Excel 2007 or Excel 2010 on client computers that run Windows 7. D. Open workbooks by using Excel 2007 or Excel 2010 on client computers that run Windows 8. Answer: AB QUESTION 30 Hotspot Question You are the Microsoft Exchange Online administrator for your company. The company has been using Exchange Online for over two years. Employees report that items are disappearing from their primary mailboxes. You discover that an old retention policy is enabled for the employee mailboxes. You need to ensure that items are not automatically removed from employees' primary mailboxes. How should you complete the relevant Windows PowerShell script? To answer, select the correct code segment from each list in the answer area.

Answer Area

\$UserMailboxes = -Filter {(R
Get-Mailbox
Set-Mailbox

\$UserMailboxes | -Retention
Get-Mailbox
Set-Mailbox
New-Mailbox
