QUESTION 111You have been instructed to make sure that the technical prerequisites with regards to scalability are adequately met. To achieve this, it is necessary to access the web.config file to configure session storage.You want to make use of a SessionState mode that stores session state in a process that is separate from the ASP.NET worker process or IIS application pool. Which of the following should you make use of? A.   You should consider making use of the In-process mode.B.   You should consider making use of the Off mode.C.   You should consider making use of the SQLServer mode.D.   You should consider making use of the StateServer mode.E.   You should consider making use of the Custom mode. Answer: D QUESTION 112You have been tasked with creating a Communication Foundation (WCF) service that makes use of the Item class. You are informed that the Item class should be updated in such a way that it satisfies storage prerequisites.You start by marking the Item class with the DataContract attribute.Which of the following actions should you take NEXT? A.   You should consider making sure that the public members of the Item class is marked with the EnumMember attribute.B.   You should consider making sure that the private members of the Item class is marked with the DataMember attribute.C.   You should consider making sure that the private members of the Item class is marked with the EnumMember attribute.D.   You should consider making sure that the public members of the Item class is marked with the DataMember attribute. Answer: D QUESTION 113You have received instructions to make sure that IIS errors are handled in accordance with the prerequisites.Which of the following actions should you take? A.   You should consider bringing the customErrors attribute in the web.config file up to date.B.   You should consider bringing the customErrors attribute in the machine.config file up to date.C.   You should consider bringing the customErrors attribute in the app.config file up to date.D.   You should consider bringing the customErrors attribute in the client.config file up to date. Answer: A Case Study 6 - Digital Data Conversion (QUESTION 114 - QUESTION 120)BackgroundYou are developing a service that allows for the direct digital-to-digital data conversion of one encoding to another. Users currently employs the service for the uploading of audiovisual media files for conversion to different formats, as well as for the viewing of the converted files.Business RequirementsThe client-side section of the application has been created as an ASP.NET MVC application using Visual Studio 2012. The client-side of the application allows for the uploading of audiovisual media and the planning of transcoding by administrators. Furthermore, administrators and users are allowed to download the audiovisual medias that have gone through the direct digital-to-digital data conversion process.Metadata is attached to uploaded audiovisual medias for identification purposes. As soon as the audiovisual media upload is complete, this metadata is collected by a single system.User computers must have Microsoft Internet Explorer 7 installed, as a minimum.The application excludes a header that can be viewed on all pages. The header has been configured to display links to administrative functions for users logged in as administrators. A cookie, which is configured on the server, supplies this data. In the event of an error condition existing, the administrative links should not be displayed.Technical RequirementsUser Experience:Users are able to scrutinize a list of audiovisual medias via the front-end web application.The presented page is configured as the application's principal view.Every request causes the HTML elements, other than the list of audiovisual medias, to change. This, in turn, causes the page to reload.Compatibility:Some user browsers, which do not support the HTTP DELETE verb, sends a POST request with an HTTP header of X-Delete when the expected operation is to delete.Transcoding:A set of Windows Azure worker roles has been configured for transcoding purposes. A third-party command line tool must be installed for transcoding. The path to the utility is hosted by an Environment variable, subsequent to tool installation. The license key is included in a variable,

named license. When the utility is not in use, it has to be unregistered. Furthermore, a substantial quantity of resources is consumed by the utility.At any given time, the utility can have ten instances of the utility running, at most. An instance of the role must allow other roles to process the additional audiovisual media that it cannot.Errors are logged to a Logs directory under the utilities path by the utility.Performance information is collected by a local Azure directory resource, named perf.Development:Errors generated by the utility must be examined by developers via Microsoft Remote Desktop Protocol (RDP). This functionality has been provided by the creation of an x509 certificate that has been distributed to the developers. Only RDP must be used by developers for this function. QUESTION 114You have received instructions to create a new a new authentication strategy. The new strategy must make use of an HTTP header value. Furthermore, you are informed that the operation of the current authentication strategy should not be disrupted.After creating the new strategy, you are required to apply it.Which of the following actions should you take? (Choose all that apply.) A. You should consider creating a class based on the AuthorizeAttribute class.B. You should consider creating a class based on the AuthorizationContext class.C. You should consider checking for a valid HTTP header value in the AuthorizeCore method.D. You should consider checking for a valid HTTP header value in the OnAuthorization method.E. You should consider checking for a valid HTTP header value in the OnCacheAuthorization method. Answer: AC QUESTION 115You have received instructions to improve the execution of the audiovisual media transfer.You are preparing to write the necessary code. Which of the following actions should you take? A. You should consider making use of the DeflateStream Class.B. You should consider making use of the ZipArchive Class.C. You should consider making use of the ZipFile Class.D. You should consider making use of the GZipStream Class. Answer: D QUESTION 116You have received instructions to make sure that the utility registration occurs in accordance with it license. To achieve this, you are preparing to write code that includes a method in the TranscodeWorkerRole class.Which of the following is a process method that should be included in your code? A. The OnExited method.B. The WaitForExit method.C. The WaitForInputIdle method.D. The Kill method. Answer: B QUESTION 117You have been tasked with making sure that, prior to the worker role launching, the utility is implemented.Which of the following actions should you take? A. You should consider configuring a startup task.B. You should consider configuring a task schedule.C. You should consider manually implementing the utility every time you log on.D. You should consider configuring a logon script. Answer: A QUESTION 118You are instructed to make sure that the deletion of audiovisual media is not dependent on browser ability.Which of the following actions should you take? A. You should consider writing code to create a SendSync method.B. You should consider writing code to create a SendAsync method.C. You should consider writing code to create a RetrieveAsync method.D. You should consider writing code to create a RetrieveSync method. Answer: B QUESTION 119You have been instructed to make sure that developers have the ability to access a Windows Azure role via RDP.You start by exporting a certificate with a private key.Which of the following actions should you take NEXT? A. You should consider uploading the .cer file to the Certificates section of the TranscodeWorkerRole hosted service on the Azure Management Portal.B. You should consider downloading the .cer file from the Certificates section of the TranscodeWorkerRole hosted service on the Azure Management Portal. C. You should consider downloading the .pfx file from the Certificates section of the TranscodeWorkerRole hosted service on the Azure Management Portal.D. You should consider uploading the .pfx file to the Certificates section of the TranscodeWorkerRole hosted service on the Azure Management Portal. Answer: D QUESTION 120You have been instructed to maximize performance for users who download audiovisual media via HTTP clients that support different content encodings by configuring caching on the DownloadAudiovisualMedia action.You want to write code to include the necessary attribute.Which of the following is a property that should be included in your code? A. The VaryByControl property.B. The VaryByCustom property.C. The VaryByHeader property.D. The VaryByParam property.E. The VaryByContentEncoding property.
