QUESTION 141A company has a main office and a branch office. The network contains a single Active Directory domain. All computers are members of the domain.Five users in the branch office report that their Windows 7 computer is slow when it runs multiple applications.From your computer, you need to identify the application that consumes the most processor resources on the computers.Which tool should you use? A. Event ViewerB. Performance MonitorC. CPU Meter gadgetD. Task Manager  
Answer: BExplanation:<http://www.youtube.com/watch?v=1S9wLElymz8> QUESTION 142A company has new portable computers running Windows 7.On one of the computers, the USB mouse cursor does not move. You connect the mouse to another computer, where it works correctly.You need to recommend possible solutions to the problem.What should you recommend? (Choose all that apply.) A. Connect the mouse into a different USB port.B. Enable the USB controller in the BIOS.C. Disable the computer's trackpad.D. Disable Hot Keys on the computer.E. Turn on Mouse Keys. Answer: ABC QUESTION 143You are troubleshooting performance issues on a Windows 7 Enterprise client computer.An unfamiliar service is running on the computer.You need to recommend the solutions that identify which process identifier (PID) is associatedwith the service.What should you do? (Choose all that apply.) A. Pun the System Configuration utility (rnsconfig.exe) and view the Services tab.B. Run the sc query command.C. Use Windows Task Manager and view the Services tab.D. Run the sc queryex command.E. Run the Services management console. Answer: CD Explanation:[http://technet.microsoft.com/en-us/library/dd228921\(WS.10\).aspx](http://technet.microsoft.com/en-us/library/dd228921(WS.10).aspx) In order to get to know, or view, retrieve and identify the process ID or PID of the processes running in Windows operating system, users or administrators can make use of Task Manager. However, Task Manager does not display PID information by default. To display the PID value in Task Manager, go to Processes tab, click on View menu, and then click on Select Columns.... In the "Select Columns" or "Select Process Page Columns" dialog, tick and check the checkbox for PID (Process Identifier), and click OK.

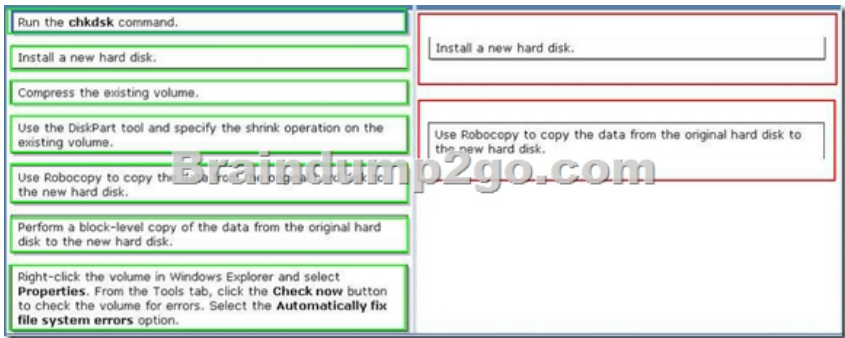

QUESTION 144A company has computers running Windows 7 Enterprise. Connections to the company's wireless network are filtered by MAC address. The company purchases a new computer that must be connected to the wireless network. You need to recommend all the commands that discover the MAC address of the new computer's wireless network adapter. Which commands should you recommend? (Choose all that apply.) A. getmac /v B. ipconfig /all C. netstat D. ipconfig E. ipconfig /allcompartment Answer: AB Explanation: <http://technet.microsoft.com/en-us/library/bb490913.aspx> QUESTION 145 Existing Internet Explorer security settings and GPOs are applied throughout the company.
