Which solution best meets the customer's needs? A. a collection of tower serversB. high-performance technical clusterC. a rack of 1U serversD. a collection of blade servers Answer: B QUESTION 43You are designing an HP ProLiant BladeSystem with Virtual Connect FlexFabric and HP 3PAR StoreServ 3400c. The customer is concerned about the added complexity of including SAN switches and the additional SAN management overhead. Which HP technology should you recommend? A. HP B-Series SAN Network AdvisorB. HP FlexFabric 20Gb 2-port 650 AdapterC. Virtual Connect Flat SAND. HP FlexFabric 5930 Switch Series Answer: C QUESTION 44A customer is implementing a new mission critical application. The customer needs to protect against RAM errors, minimize cost, and maximize the use of all installed memory DIMM's. Which feature of the HP ProLiant Gen 9 server should recommend to the customer? A. memory mirroringB. smart cachingC. Advanced Data Mirroring (ADM)D. Rank sparring (online spare) Answer: DExplanation:ProLiant Gen9 servers include these advanced memory protection features:Dynamic fail-over to a spare DIMM rank or spare rank pair behind the same memorycontroller. No OS involvement. You cannot enable this feature concurrently with memory mirroring. HP offers the rank sparing rather than DIMM sparing as rank sparing uses less spare memory resulting in less overhead.<http://h20195.www2.hp.com/V2/getpdf.aspx/4AA5-4487ENW.pdf> QUESTION 45You are designing an HP ProLiant BladeSystem and HP StoreVirtual storage solution for a customer, and you need to estimate the power requirements.Which IP tool should you use? A. Power Discovery ServicesB. Power Calculator UtilityC. Insight Management SizerD. HP Power Advisor Answer: D QUESTION 46What are benefits of the RESTful Interface Tool for enabling the new style of IT? (Select three.) A. reduced deployment complexityB. lower facilities costsC. simplified scriptingD. reduced issue resolution timeE. easy customizationF. increased high availability Answer: ACE QUESTION 47You are designing a Citrix XenServer based virtualization solution that runs on ProLiant Gen9 servers. Which design parameters should you take into consideration as part of your solution? (Select two.) A. 35 percent additional hardware resources for host server overheadB. memory consumed by the Control Domain on the hostC. NVDIMMS configured as caching modules for the host OS installationD. FCoE dedicated network for XenServer migrationsE. memory consumed by the XenServer crash kernel Answer: BD QUESTION 48A customer is concerned about the security of their data center. The existing card entry system has proven to be inadequate. Which solution should you recommend to increase the security level for self-access to the data center? A. complex passwordsB. fingerprint scannersC. Access Control ListD. 256 AES encryption Answer: B QUESTION 49You are describing Smart Array controllers for ProLiant Gen9 server to a customer. The customer asks about data recovery of a failed large capacity disk drive. Which feature of the controllers should you describe to the customer? A. Secure EncryptionB. SmartMemoryC. Rapid RebuildD. Advanced Data Mirroring Answer: CExplanation:Rapid Rebuild -- With drive capacity increasing to 6 TB and more, it takes a longertime to rebuild if a drive fails, thus putting the data on that drive at risk. HP hasoptimized the Smart Array controller firmware to rebuild larger capacity drivesmore quickly in order to prevent data loss
